GREETINGS

Another season is over and we are truly grateful for the fine business we had this past year, and it is most gratifying to have so many tell you, "my bulbs did fine."

While we had to return some orders unfilled, and sold too close on some varieties and will not list them this year. We have more orders on our books now than we have ever had before at this time of year. It is still our aim to give quality, service and satisfaction at all times if at all possible.

Bulbs are scarce and prices some higher than last year. We were very short on help but had a fine crop of clean plump bulbs. We will list in large, medium and bulblets. By planting a few bulblets each year is a good way to build up a stock of good bulbs for the next year. Bulblets should be planted early for best results.

We do not accept orders for less than \$1.00.

Will start to ship bulbs March 15 if weather permits. Our bulbs are state inspected. Inspected No. 745. Terms, Cash before delivery. 5 bulbs may be ordered at the 10 rate, for instance 10 for 75c, 5 may be had for 38c.

GLAD CULTURE IN A NUTSHELL

1. **Planting Time**—April 1 to June 25.
2. **Site**—In full sunshine, well drained soil. Keep away from buildings trees and shrubbery, stir soil often.
3. **Planting Depth**—Bulblets, 2 inches, small size 3 inches;—medium 3 to 4 inches, large 4 to 6 inches. Rows—2 to 3 feet apart.
4. In cutting flowers, leave at least 4 leaves intact.
5. **Lysol Dip**—1 tablespoon lysol; 1 gallon water. Soak bulbs 4 to 6 hours immediately before planting.
6. **Thrip Spray**—2 ozs. tartar Emetic; 2 ozs. brown sugar or corn syrup; 3 gallons water. Mix well. Spray weekly after third leaf of foliage appears until bloom starts.
7. Dig bulbs about 6 weeks after varieties are done blooming usually in October. Store in coolest part of basement after bulbs have been dried thoroughly in shade.
